SKILLS

Programming:	Python, Java, JavaScript, JSX
Frameworks & Libraries:	React, Three.js, React Three Fiber, Drei
AI & Machine Learning:	Generative AI, AI Automation, Computer Vision, Prompt Engineering, LLM Fundamentals
AI Tools & Platforms:	OpenAI, ChatGPT, GitHub Copilot
3D & Game Development:	Unity, 3D Model Design, GLB/GLTF, Game Development, Game Testing
Database:	SQL, MongoDB
Tools:	GitHub, VS Code
Web & Other:	3D Web Development, SEO, Video Editing

SUMMARY

BCA graduate and aspiring Python Developer who enjoys building applications, solving programming problems, and learning new technologies. I have worked on practical projects using Python and frontend technologies, while also exploring AI and AI-based solutions. I have experience with frontend and backend development, including responsive websites and interactive 3D web projects, and I am looking to grow my skills through real-world software development opportunities.

PROJECTS & IMPLEMENTATION

AI Document Intelligence System : (work in progress)	Python FastAPI RAG Vector Database LLM Building an AI-powered document system that allows users to upload documents and interact with their content using natural-language queries.
AI Change Impact Analyzer : (work in progress)	Python AI Git/GitHub LLM Building an AI-based tool that analyzes code changes and identifies potentially affected files, functions, or components.
Interactive 3D AI Portfolio Website :	React Three.js React Three Fiber Drei JavaScript AI/LLM Building an interactive 3D portfolio with animated characters, 3D environments, interactive navigation, and an AI assistant for answering recruiter questions.

EXPERIENCE

Intern - Infosystem	05/2026 - 07/2026
- Developed 3+ web projects using HTML and CSS, gaining hands-on experience in basic web development. - Worked with Microsoft Word, Excel, and Google Docs for creating, editing, and organizing documents. - Learned to use common office and web tools through practical day-to-day tasks. - Created and organized 20+ documents and spreadsheets using Microsoft Word, Excel, and Google Docs.	
Technical Experience - Built 5+ practical Python projects, improving my programming, problem-solving, and debugging skills. - Gained hands-on exposure to data science and AI, working with data and exploring practical AI-based solutions. - Developed interactive web projects using HTML, CSS, JavaScript, React, and Three.js, with a focus on responsive and engaging user experiences.	

EDUCATION

Bachelor of Computer Applications (BCA)	2023–2026
Acharya Bangalore Business School	
Bengaluru, Karnataka, India
